About the Semantic Web Training

The certification training covers all relevant Semantic Web methodologies and concepts. Semantic Web Associates are able to relate business challenges with semantic technology solutions. They have developed a specialised technical vocabulary that enable them to communicate with Semantic Web experts and benefit from their solution approaches.

Semantic Web Associates have developed skills and knowledge in:

- ✓ Various types of Knowledge Graphs
- ✓ Metadata Management
- ✓ Linked Data
- ✓ Basics of the query language SPARQL
- ✓ Semantic Text Mining Fundamentals
- ✓ Corporate Semantic Web Architectures
