Nika Mizerski
Head of PoolParty Academy

Andreas Blumauer
CEO of Semantic Web Company

About the Knowledge Engineering Training

The Knowledge Engineering certification training is the sequel to the Semantic Web training. Knowledge Engineering specialists have a fundamental overview of all relevant Semantic Web methodologies and concepts. The advanced training enables them to apply their knowledge in Taxonomy and Ontology Management. They have practical experience in using PoolParty Semantic Suite.

Knowledge Engineering Specialists have skills and expertise in:

✓ Relating business challenges with semantic technologies
✓ Developing knowledge graphs for dynamic applications
✓ Enriching knowledge graphs through text-mining operations
✓ Using Linked Data sources for effective knowledge modelling
✓ Managing the knowledge engineering process in a cross-functional corporate environment
